

Is your bladder affecting your quality of life?

1 in 4 adults are affected by bladder problems.¹⁻⁴

Common symptoms of BPH, stress incontinence, and overactive bladder

- Sudden, hard-to-control urges to go
- Needing to go frequently (8+ times a day)
- Waking at night
- Leaking caused by coughing or sneezing
- Feeling your bladder doesn't fully empty
- Weak or inconsistent urine stream

Get Answers with the Glean[®] Uroynamics System

Glean is a minimally invasive, patient-friendly, uroynamics system that evaluates your bladder in a natural, real-life way. By measuring how your bladder fills and empties during normal activity, Glean helps your doctor pinpoint what's causing your symptoms and guide you toward the right treatment and long-term relief.

Talk to your doctor about Glean.
